### Operation

#### Using FM Transmission function:

1. Plug the FM transmitter into your vehicle's cigarette socket, turn on car radio and choose an unused FM frequency. Long press the button until the frequency display starts to blink, then rotate the button to change the frequency until it matches the car radio.
2. Insert the USB stick/MicroSD card containing the MP3/WMA files you want to play into the USB port/card slot. It will play and transmit the audio to the car stereo system automatically. (Max. size 64GB)

#### Using Bluetooth function:

1. Turn on the Bluetooth of your mobile device, search device name "PNG114" and pair device. (If prompted for a password, please enter "0000")
2. After pairing successfully, it will transmit your phone's music to the car stereo system. If you receive a call whilst in music playing mode, it will automatically switch to phone call mode if there's an incoming call.
3. Click once to pick up the phone call, click again to end the call.
4. Double click to reject the incoming call.
5. To redial last number, double click when there is no active call.

#### Using the charging function:

1. This car kit has two USB ports with a total output of 5V/3.1A. It will charge phones, tablets and other mobile devices.
2. The USB port with a lightning symbol next to it is designed for charging, with an output of 5V/2.1A. The USB port with a music symbol next to it is designed for music playback but will also charge your devices with an output of 5V/1A.
